

'From Guidelines to Action' (FG2A)
HI Webinar: Introducing the Guidance on making food security assessments more disability-inclusive, 052024

### **Agenda of Webinar**

Q&A

Why?

Disabilityinclusive
food security
is important

What?

Process of development of guidance, structure and content of the guidance Who?

The future user & Who was engaged in the development

How?

Suggestions for starting to use the guidance & Input from WFP.

### Background

Persons with disabilities face disproportionately higher levels of risks to their food security due to barriers

Destruction of infrastructure including roads leading to assistance, displacement, insecurity, breakdown of social networks, closure of services

#### **EXACERBATED BY BARRIERS**

#### **Environmental barriers:**

- · Inaccessible and unsafe food distribution points
- Lack of accessible information and communication related to food entitlement, distribution and nutrition programmes
- · Inaccessible transportation, buildings and food package formats

#### Attitudinal barriers:

- First responders lack awareness and knowledge about persons with disabilities
- Lack of awareness and knowledge about specific nutrition requirements of persons with disabilities

#### Institutional barriers:

- Lack of technical capacity to promote the inclusion of persons with disabilities in food security and nutrition policies and programmes
- Government food security and nutrition policies and programmes are not inclusive of persons with disabilities
- · Lack of accurate data on persons with disabilities and their locations

#### Risks faced by persons with disabilities

Violence, poverty, environmental hazards, deterioration of health, exclusion, isolation, difficulty accessing food assistance, malnutrition

# Why this guidance & process of Guidance Development

Lack of available practical quidance to review, adapt and revise food **security** data collection tools to ensure disabilityspecific needs, barriers, risks, and capacities are considered.

#### Tool collection

•General food security tools (WFP, WHH & ther local actors) & barries & facilitator tools

First Review Grid development

- •Utilizing the IASC GL
- •Testing with review of tools

Identification of good practice & gaps

•Review of food security tools

FINAL Draft Review & Adaptation Guidance

Dissemination

Review & adapt
Workshop, at global
and local levels

•To use and adapt draft guidance

Establish Draft ZERO Review & Adaptation Guidance:

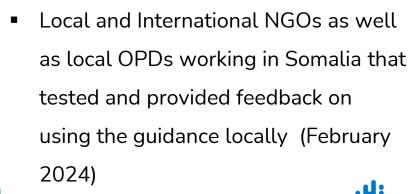

•Based on good practices

### Who was engaged?

- 10-member global Technical Taskforce (TTF) established in May 2022 as part of project
- Engaged in development & review of the Guidance to adapt protection assessments

### Objectives, foundations & intended users

**Objective**: To support humanitarian food security organisations that wish to adapt their food security data collection tools and processes to get better quality information on and with persons with disabilities.

**Policy Foundation**: IASC Guidelines on Inclusion of Persons with Disabilities in Humanitarian Action, and in particular the food security chapter

What shaped the feel and look: Inter-agency work, existing tools, inputs from field teams and global technical advisors, including OPDs

**Target users:** Mainstream humanitarian food security practitioners, in particular programming and technical advisors, as well as MEAL colleagues

# What can be reviewed using this guidance?

- Standard Operating Procedures (SOPs)/ guidances and processes
- Assessment questionnaires and the processes of administring needs, feasibility and distribution related assessments:
  - Focus Group Discussions, Key Informant, other Questionnaires
  - Demographic sections
  - Observation Tools & processes
  - Feedback Mechanisms

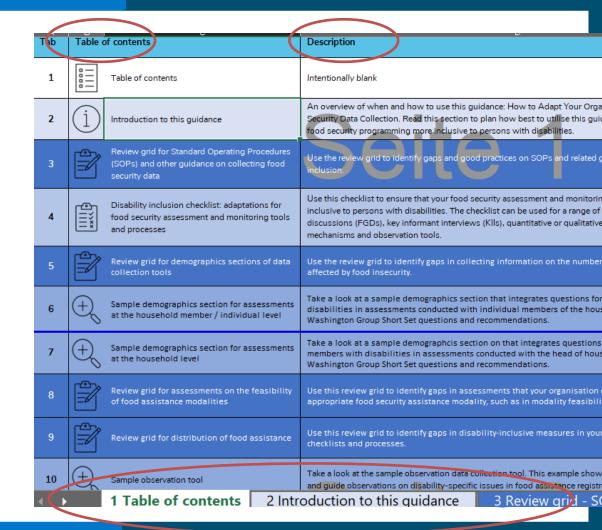

### The overall structure of the guidance

#### **Supporting tabs:**

- Introduction
- Terminology
- Further Resources

#### **Actual Guidance:**

- 4 Review Grids
- 1 Checklist
- 2 Question banks
  - -> Individuals
- -> Community leaders, service providers
- 3 Sample tools

### How to approach your start...

You want to check whether this tools could be of interest & how it is to be used?

#### Use:

- > Tab 2: Check more indepth information on purpose, scope and targeted users
- > How-to Note for guidance

Your organization/ colleagues are new to Disability inclusion

Tab 14: pick the right learning resource from e-learning to online to face to face training modules & guidance

Use:

# To review standard operating procedures (SOPs) & related Guidance

To identify gaps in your standard operating procedures & processes

#### Use:

- > Tab 3: the review grid on SOPs,
  - > **Tab 4:**containing
    checklist for
    accessible
    assessment
    processes

To identify solutions for the gaps

- > **Tab 3:**Recommended actions & referenced practices
- > **Tab 4:**Recommended actions of coulmn B

### To review feasibility assessments

To identify gaps in your assessment process & tool(s)

> Tab 4:
Checklist on
accessible
assessments,
columns KII,
FGDs &
questionnaires
> Tab 8:
Feasibility
Assessments

To identify solutions for the gaps

#### Use:

> **Tab 4:** Checklist, recommended actions in column B relevant for your questionnaires

- > **Tab 8:** Recommended actions and referenced good practices
- > **Tab 11:** Question bank/ persons with disabilities, section on feasibility assessments
- > **Tab 12:** Question bank/ community level barriers

# To Review your food security assessments & monitoring

To identify
gaps in
your food
security
assessment
and
monitoring
tools &
processes

> **Tab 4**: Checklist on accessible assessment, KII, FGDs, questionnair es & observation

#### Use the:

> **Tab 4**: Checklist, applicable recommended actions in column B for observations,

> **Tab 11:** Question bank/ persons with disabilities, sections on a) food basket/ expenditures, b) NFI expenditure, c) Distribution/ Feasibility and d) coping strategies

> **Tab 12:** Question bank/ community level barriers

### To review your distribution tool and processes

To identify
gaps in
your
registration
&
distribution
tools &
processes

> Tab 4: Checklist on accessible assessment s, column observation > Tab 9: Review grid, on distributions

> **Tab 4**: Checklist, applicable recommended actions in column B for observations,

> **Tab 9:** Recommended actions and referenced good practices

> **Tab 10:** Sample observation tool distributions

> **Tabs 11 & 12:** Question banks, T11: Section distribution, T12: all

### To review Feedback and Complaint Mechanisms

To identify
gaps in your
food security
related
feedback and
complaint
mechanisms

To identify solutions for the gaps

- > **Tab 4,** Checklist, applicable recommended actions in column B for Feedback and Complaint Mechanisms,
  - > **Tab 14**, Resources section for further guidance on inclusive mechanisms (IRC guidance)

### Structure of Review Grids, Feasibility

Background of this tab

Recommended steps

**Review Grid** 

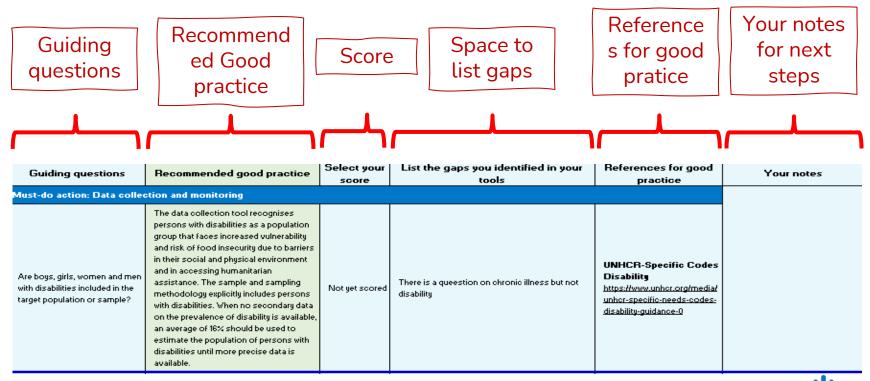

If relevant, modify the guiding questions to the context and country where your organisation's tools will be used. For example, in contexts where ATMs are not available, replace this with a money delivery or transfer system relevant to the context.

The guiding questions are grouped by must-do actions as outlined in the IASC Guidelines on Inclusion of Persons with Disabilities in Humanitarian Action. The green column shows typical elements of assessments in which disability inclusion is integrated well. The review grid includes columns for your notes as well as references that will support you in adapting feasibility assessments.

Please note, that disability inclusion in food security data collection is a somewhat new thematic. Hence, where references for good practices are not available, the recommended good practice is based on expertise from practitioners and the IASC Guidelines. This is a living document. If you come across references for good practice on disability inclusion food security tools, please share them with us for the next updated version of this guidance. Contact us at Humanity & Inclusion: Ulrike Last (u.last@hi.or).

Intentionally blank	Recommended Steps for Use							
Step 1	Read the description and instructions above.		* 4					
Step 2	Review and compare your document or tool with the guided questions and recommended good practice. Does your document or tool include these elements? If so, score your document or tool using the dropdown menu as no adaptation needed.							
Step 3	If your document or tool is not aligned with good practimenu accordingly.	ctice, review yo	ur document or tool and assess whether it is pa	rtially aligned or not aligned. S	icore your document or tool using the dropdown			
Step 4	List the gaps you have identified in your document o	r tool using the	column indicated.					
Step 5	Use the references for good practices to find sugge	stions on how t	in document or tool and assess whether it is partially aligned or not aligned. Score your document or tool using the dropdown column indicated.  adapt your document or tool for disability-inclusive approaches.  List the gaps you identified in your tools    References for good practice   Your notes					
Step 6	Repeat steps 1-5 for each guiding question.							
Guiding questions	Recommended good practice	Select your score		_	Your notes			
Must do action: Meaningful par	ticipation							
Does the assessment process include consulting persons with disabilities on requirements for specific foods they need because of their disability or health condition, and adapted and accessible cooking materials and tools?	As part of the overall needs and feasibility assessment, the tool guides practitioners to consult persons with disabilities among the affected population on distance requirements they may need because of their disability or health condition. Also adapted and accessible cooking materials and tools that persons with disabilities are taken into account.	Not yet scored	Fill this in	Intentionally blank	Fill this in			
Must do action: Addressing bar	rriers				Fill this in			
Does the assessment tool take into account availability and prices of and access to foods that persons with disabilities have said they need to meet distray or health requirements, and also availability of non-food items they require for preparing food?	The assessment tool includes questions that guide practitioners to assess availability of food items and non-food items that persons with disabilities require. These may be certain hides of foods, for example soft foods or foods of a specific nutrient composition. Non-food items may be adopted cooking materials or tools that meet accessibility requirements of the user with a disability.	Not yet scored	Fill this in	Intentionally blank	Fill this in			
Must-do action: Data collectio	n and monitoring				Fill this in			
Do feasibility assessments allow for	The assessment reporting tool guides data analysts to report on	Not net	Seite 2

### Question Bank, individual

#### **Background & use**

**Exploring share in food basket expenditure** 

**Exploring NFI** expenditures

Feasibility/ distribution mechanisms

**Coping strategies** 

should be applied to the relevant section of your organisation's assessment and monitoring tools. The questions can be applied to focus group discussions and to key informant interviews, especially in hard-to-reach communities where focus group discussions are difficult to organise. Consider adapting questions to be specific to the context your organisation is working in.

Ensure that enumerators ask respondents with disabilities directly when collecting data on disability-specific risks, instead of from family or household members or other support persons. Information on disability-specific determinants gained from others, i.e. not directly from persons with disabilities, may be biased.

When analysing data obtained using the questions below, ensure disaggregation of data and analysis by sex and age in order to reveal differences in access between e.g. men and women.

\*Note that the word 'disability' is not used in these questions, because in many languages and cultures it is associated with negative perceptions of disability. Instead, when asking the question, describe people with difficulties with functioning in daily activities, for example persons with a lot of difficulties moving,

	QUESTION	NOTES		
Food	basket / Food expenditure share			
1	functioning or health condition?* If yes, what types of foods? Please describe reasons why you require	Probe for availability and access to specific dietary requirements arising from the respondent's disability or health condition.		
Non-f	ood item expenditure			
4	Do you need cooking materials, tools, utensils or fuelfenergy sources that are accessible for your use and adapted to accommodate your impairment or difficulties in functioning?" If yes, what kinds of cooking materials, tools, utensils or fuelfenergy sources?	Some persons with disabilities may need assistive devices or adapted cooking materials, tools and utensils that enable them to prepare food. In addition to considering these disability specific needs in distribution of cooking materials, these may incur additional expenses which should be calculated into household expenditure. NOTE: this question should be posed to the person in the household that makes decisions on ecoking materials etc.		
Distri	bution mechanisms / feasibility assessments			
8		Persons with disabilities may face barriers in accessing markets and may prefer in-kind distribution.		
Copir	ng strategies			
13		This question is intended to identify solutions and impage with affected populations as partners in overcoming obstacles.

### Question Bank, Community,

Background & use

Questions to explore attitudes and perceptions towards persons with disabilities, in link with accessing food security Use the questions below to assess the knowledge, attitudes and practices related to disability among people in positions of power and service providers in the community. The questions should be addressed to community members that are involved in food security programming, such as community leaders and food security committees supporting identification of households for assistance, staff and volunteers working with registration and distribution, local authorities and service providers of markets, shops and financial institutions. Questions can be incorporated into, for example, focus group discussions or key informant interviews.

\*Note that the word 'disability' is not used in this question, because in many languages and cultures it is associated with negative perceptions of disability. Instead, when asking the question, describe people with difficulties with functioning in daily activities, for example persons with a lot of difficulties moving, hearing, seeing, concentrating or remembering, or persons who face challenges or obstacles in accessing services.

	QUESTION	NOTES				
1	Who, if any, among your community members experience challenges or obstacles in accessing services in the community and benefiting from food assistance? $^{*}$	Introductory question: Assess whether the respondent recognises that persons with disabilities are community members and m be in vulnerable situations because of limited access to services and assistance.				
2	Question to traders and other service providers: Are persons who experience challenges or obstacles in accessing services potential customers? Why or why not?*	Assess perceptions of persons with disabilities and potential measures needed for persons with disabilitie to access the services provided by the respondent.				
3	What do you think are the best ways to support persons with disabilities, who face challenges or obstacles in accessing services, to make sure they can access services in the community and benefit from food assistance?*					
4	Who in your community are persons with disabilities?	Assessment of knowledge about disability:  Assess whether the respondent has an understanding that disabilities are not only visible and physical impairments, but that a person with a disability may have other kinds of impairments, especially non-visones, e.g. vision, hearing, intellectual or learning and psychosocial impairments. Referring to, for example only wheelchair or crutch users suggests a limited understanding or unsatility.

### **Checklist structure**

Background & use

both assessments and monitoring data collection.

These steps are based on must-do actions in the IASC Guidelines on Inclusion of Persons with Disabilities in Humanitarian Action and standards in the Humanitarian Inclusion Standards for Older Persons and Persons with Disabilities.

	Checklist	Focus Grove Discussions	Key Informant Interviews	Questionn lires	Fredback mechanisms	Ob: ervations
1	Train programme management staff , MEAL staff, practitioners and enumerators on disability inclusion and accessibility.	х	х	х	х	×
2	Budget accessibility measures and reasonable accommodations for the food security assessment data collection.	x	×	×		Intentionally blank
3	Ensure persons with disabilities are included in the data collection sample.	x	×	x	x	Intentionally blank
4	Include persons with disabilities as community focal points in food security assessment and monitoring teams.	x	×	С		Intentionally blank
5	For inviting persons with disabilities to participate in food security assessments and monitoring, reach out to organisations of persons with disabilities, disability-specific organisations and local authorities in the relevant geographical area.	x	×	x	x	Intentionally blank
	Ensure that diversity among persons with disabilities

Column B, recommended actions

### Adaptation to your needs & interests

- Tool is excel based
- Can be adapted to your organization needs
  - If no SOPs/ guidance -> remove the tab 3 on SOPs
  - If no observation -> remove sample observation tool
  - If no demographic sections -> remove the Tab 5, 6 & 7 on demographic sections
  - Etc.

### Recommended use, tba

Initial disability training – before adapting the tools Setup a small cell/ task force, ideally MEAL and operation staff, invite OPD Discuss which tools and part of assessment process to review, timelines & responsibilities Review your food security data collection and tools, related guidance Before finalizing consider consulting other program teams, the future users Pilot or test adapted tools Edit and finalize tools

### **Limitations**

- Many organizations guard their assessment tools
  - Received tools for review but not to share publically
  - Limited sharing of good practices
- Accessibility of excel documents: we employed design that allows for maximum readability by screen readers
  - Considering after user feedback -> alternate format for screen reader users
- Time limitation:
  - More time for consulting, testing and piloting would have been ideal -> version 1 -> based on feedback from users -> version 2

Input from Kavita Brambatt, Senior Disability Inclusion Advisor, WFP:

What is the potential of such tools to make data for FS programming more disability-inclusive?

### Reflections

- 1. What planet are you on?
- 2. Vulnerability is vulnerability we have this covered...
- 3. The only thing we know is that there are some things we don't know
